

La Marque Fire Department

When an emergency is happening, seconds count! The La Marque Fire Department would like to remind you to ensure emergency vehicles have unimpeded access through your neighborhoods. When vehicles park on the road, it creates a situation wherein emergency vehicles must reduce speed to ensure they can maneuver by them. When vehicles are parked across from each other, it can reduce the access to a point where the emergency vehicles cannot go between them and delay first responders from arriving at the emergency.

This impeded traffic flow is against the law and can have a negative impact on someone's health and/ or additional damage to property (due to the response delay).

Please be a good neighbor and park in designated driveways when available and NEVER park across from another vehicle and/ or impede the flow of travel. Thank you for ensuring our emergency vehicles have this access and can arrive as safe as possible.
